Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 48-52 are rejected under 35 U.S.C. 102(e) as being anticipated by Wang.

The reference shows a "reaction vessel" with an outer container having an outer wall (100, 802). A plurality of "compartments" including at least a first electrode compartment and second electrode compartment, a plurality of separate electrodes including a first electrode in the first compartment and second electrode in the second compartment. There is/are filter(s) which are configured to prevent selected matter to pass across the filter(s). (See figs 17 and col. 36, lines 30-40).

As for claim 50, there are shown annular walls and spaces defining an annular anode electrode (Fig. 17A).

The reference does not recite interface members, per se, however the recitation of filters in claim 52, suggests that the interface members and filters are the functional equivalents of each other.

Allowable Subject Matter

2. Claims 1-47 and 57-86 are allowed.
3. Claims 53-56 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 1742

4. The following is a statement of reasons for the indication of allowable subject matter: The prior art does not show or suggest apparatus with an outer container having an outer wall; a first outlet to introduce a primary flow into the outer container at least a second outlet to introduce a secondary flow into the outer container, a flow separate from the primary flow and having a dielectric field shaping unit in the outer container coupled to the second outer to receive the secondary flow and the field shaping unit configured to contain the secondary flow separate from the primary flow and the field shaping unit having at least one electrode compartment.
